## Covering Letter

June 3, 2025

Dear Recruiting team,

I am excited to apply for the QA Automation Engineer role you have posted in the Dice Job board, bringing with me over 12 years of experience in software development, and 7 years of testing, and quality assurance. My expertise spans multiple areas, including computer system validation (CSV), ISO 13485 standards, Scrum ceremonies, and Agile methodologies.

As a seasoned professional, I have developed strong skills in cross-functional communication, ensuring alignment between QA, Dev, and Business stakeholders. My experience has taught me the importance of collaboration, mentoring, and empowering teams to drive success. In my previous roles, I have consistently demonstrated on-time delivery, effective resource management, and estimation expertise.

In addition to my technical skills, which include proficiency in Windows XP/7, UNIX/Linux programming, Java, Python, JBehave, Cucumber (BDD), Selenium, Maven, Jenkins, GitLab/GitHub, and Scrum ceremonies, I have a deep understanding of computer system validation (CSV) and ISO 13485 standards. This expertise has allowed me to effectively manage projects from concept to delivery.

Throughout my career, I have successfully mentored and empowered Dev/QA teams, promoting skill development and collaboration. My experience in running all stages of Scrum ceremonies, including Daily Stand-ups, Sprint Planning, Story Grooming, Sprint Demo/Showcase & Retrospective, has honed my ability to facilitate effective communication and ensure project success.

In my previous roles, I have demonstrated a strong track record of on-time delivery, managing timelines, estimations, and resources effectively. My experience in creating test plans, test cases, traceability matrices, validation reports, and tracking bugs to closure has allowed me to drive quality assurance efforts with precision.

I am excited about the opportunity to bring my skills and expertise to this position and contribute to the success of your team. Thank you for considering my application. I look forward to discussing this further in an interview.

Sincerely,

Anoop P Stanley
